

Bundle Issues:

The following issues were reported against the bundle. Fixes will be supplied in the next release:

1-77080 (These can be unchecked before applying if you have customized them)

The SalesLogix v7.5 Service Pack3.sxb has extra plugins and duplicate plugins

The extra plugins are the following are from previous releases:

- Scripts, VBscript system: SLX Database Support 7.2
- Scripts, VBscript system: SLX Error Support 6.2
- Scripts, VBscript system: Spell Check 7
- Scripts, VBscript system: SLX_Common 7.52
- Scripts, VBscript system: SLX Address Common 7.52
- Scripts, VBscript system: SLX Util 7
- Scripts, VBscript system: SLX Lookup Support 7
- Scripts, VBscript system: SLX ERP Link Base Common 7.21
- Scripts, VBscript system: SLX_Multi_Currency 7.213

The duplicate plugins are the following:

Create Field: Systeminfo:Unicode Char(1)NULL)

Along with all the Update CalculatedFieldData Execute SQL statements that existed in SP2.

The Manage Targets plugin has an author of 'dmirty'

1-77042

Rows missing from SECTABLEDEFS that are in RESYNCTABLEDEFS

- CampaignTargetsView
- PickListItemView
- PickListView
- TeamView
- DepartmentView

=====

.Net Extensions

1-68932

Too many arguments to 'Public Function InsertFileAttachmentEx(Filename As String) As Boolean' error when used through Visual Studio.

Admin Tools

1-52203

Integrity Checker tests for Attachments with Bad File Name and Library Docs with Bad File Names do not display count

1-63538

Integrity Checker Account Summary fix removes all non subscribed Summary records from remote

1-67681

Re: LAN Remote Client AttachDB: Default MDF Directory?

1-72301

Attachment conversion tool has misspelled word.

1-73588

Remote databases attached in Windows7 are attached to C:\ProgramData\SalesLogix\Databases, not ...MSSQL\Data

1-73737

Remote databases require Ma\$t3rk3y regardless of sysdba host password configuration - documentation needs to be updated to explain functionality

1-76736

Contact Lookup in Add Target Response view can become pre-populated and unmodifiable under certain circumstances

Administrator

1-48061

SalesLogix Setup Wizard appears with step Completed more than once under certain circumstances

1-48200

List of Index Names to choose from appears in no particular order in Add new index dialog

1-48614

Localization - Error message after deleting the last pick list in "Custom" tab

1-48657

Localization - No icons displayed when "Large Icons" selected in "Library" view

1-48672

Localization - Files added to Library from FAT32 file system cause error

1-49113

Localization - Incorrect button icon for "Title" field in User Profile dialog

1-49169

List of templates does not appear in any particular order

1-50045

Error when moving conditions in the SS index dialog

1-50318

Incorrect Spelling for "Multiple Libraries" when more than 1 library is opened in Integrity Checker

1-50485

Changing regional settings doesn't set Schedule column and last log file to change format within SpeedSearch schedules

1-52022

Function Security Tab/Edit/Edit Activity Item is changed to Edit Item after upgrade

1-52142

FSD indicates that the Last Update Field should display the name of the user triggering the Update. It does not.

1-52428

Activities refresh frequency setting saving a "0" entry it becomes "1"

1-52613

Save As RMB menu option in the Resync DB window shows "Open" in title and button instead of "Save"

1-53189

Memory leak when using user profile > calendar tab > add user

1-53258

Incremental Indexes do not remove references to records that have removed from the table

1-53649

Field named number is changed to float when synced to remote database

1-54635

Admin Tools: Add User Dialog won't pop up when user click the Ellipse button at Match Users Dialog in Vista ONLY

1-54778

"Exception EListError: List index out of bounds (24) Exception location: [00423F83]{Admin.exe

1-55012

The Last Apply Date and Last Send Date columns do not sort correctly in Administrator

1-55065

The User Types available to change a user to are different when performing from within the user profile versus the RMB

1-55730

Admin user type changing

1-57107

When using the Previous/next buttons in Client Settings in Administrator, the listing of the Default Groups: Main View will duplicate.

1-57181

Account details view not showing correct tabs when new user is created from a template.

1-57505

Field Level Security does not apply to individual users

1-58330

A scroll bar is truncated in "Edit Filter" dialog.

1-58737

Add User hotkeys for Function Security and Custom checkboxes are the same (ALT+U)

1-58825

Account Access datagrid - Cannot sort by Status

1-59009

"Set Default" does not save when "Allow multiple selections" is selected for a Picklist

1-59837

Test of Subscription Rules returns inconsistent results depending on where it is run from

- 1-59998**
Custom option allowed user to enter wrong values in fields after click on 'Edit' button

- 1-60004**
validation dropdown list is not available for Picklist selection, after click on 'Edit' button

- 1-60741**
In Admin, it display error message after click on 'Delete' tab in Picklist manager/custom

- 1-60745**
Options are missing from Entity name dropdown list in Admin, user profile/security/Entity name

- 1-61055**
SQL views ending in an underscore (_) do not display in the Database Manager

- 1-61069**
Sync Transfer list sorts by ID instead of alphabetical

- 1-61968**
Admin/Tools/Option/Client view tab, checkbox is check for Warning but Message doesn't displays in SalesLogix client

- 1-61980**
Admin/Tools/Options, Conflicts tab. 3rd Dropdown option list become enabled after select 'is remote client' value in first and second dropdown option.

- 1-62822**
User is not able to use all options from 'File' menu as SalesLogix client.

- 1-62842**
Admin/Function security/Write, Options are still available for user after remove access.

- 1-63057**
Admin/Tools/Options/Custom tab. User can enter any value in 'Validation' field after select 'Picklist' type.

- 1-63060**
Admin/Tools/Options/Custom tab. it allows to user enter any value in 'Validation' and 'Value' field after click on Edit button.

- 1-63076**
Company's name is required field but user can remove and go to next step in blank DB.

- 1-63115**
'Letter' menu item is not available in SalesLogix client/write menu.

- 1-63124**
Item mismatch in menu between Admin and client in 'View' menu, some items are missing in client and some items are missing in Admin.

- 1-63237**
In Integrity checker, After click the cancel button while the repair is running, Message doesn't display.

- 1-63244**

Known Issues - SLX 7.5 SP3

8/20/2010

Admin/Tools/Integrity checker, In Integrity Checker Test Editor box, 'Repair Type' drop down default value is 'Delete record' instead of blank.

1-63248

Admin/Tools/Integrity checker, in Integrity checker Test Editor box, 'Insert Record' option is not available in Repair Type drop down.

1-63552

In SLX remote client, SpeedSearch options, 'Daily update' schedule stay at 12.00 PM after make changes.

1-63611

Re: Administrator Edit User Profile

1-63616

Admin/user profile/Employee tab. It allows you to enter future date in 'Birth Date' field.

1-63869

In SLX Client, option 'Add contact to outlook' moved from beneath 'Intellisync' menu to beneath 'Tools' menu and 'Intellisync' menu is available in client.

1-63895

'Exit' option is missing in Admin/user profile/Function Security/ File

1-63927

'View' menu has mismatch options in Admin and SLX Client.

1-63944

Admin/user profile/Function security tab/Lookup menu/Contract sub-menu has mismatch options, between Admin and SLX Client

1-63949

Admin/user profile/Function security tab/Lookup menu/Accounts sub-menu has mismatch options, between Admin and SLX Client

1-63953

Admin/user profile/Function security tab/Lookup menu/Contacts sub-menu has mismatch options, between Admin and SLX Client.

1-63959

Admin/user profile/Function security tab/Lookup menu/Tickets sub-menu has mismatch options, between Admin and SLX Client.

1-63983

Admin/user profile/Function security tab/Tool menu has mismatch options, between Admin and SLX Client.

1-63994

Admin/user profile/Function security tab/Tool menu/manage sub-menu has mismatch options, between Admin and SLX Client.

1-64533

Adding a new folder in the Library results in an error if there's already a New Folder name in existence

1-64950

Localization - Data Link Manager shows an MSDE dialog at first start

1-65338

Removing and Adding users to This User's Calendar is not updating and saving correctly

1-65340

Library Files not syncing once Forced Distribution option is selected.

1-66801

Custom tab allow to save Custom option after select Cancel button.

1-66854

Adding History.Completeddate to the Preview Only fields in the History index results in event viewer errors for SLXSearchDataSource when the index is run

1-66947

Admin/Library, URL description doesn't appear in client.

1-67036

Changes to My Currency options in Administrator are not reflected in the Web Client

1-67109

Turnaround time change in wrong format and value after save in office profile/urgency.

1-67124

Admin/User Profile/Function Security tab/View menu has mismatch options , between Admin and SLX Client.

1-67250

Web: Login fails when using the default password assigned to new user.

1-67334

Ellipsis button (next to the Base Currency box) is disable in Manage Currency form.

1-67906

'Department' field does not appear to save when manually typed in the user profile in Administrator.

1-68361

Provide ability to apply field level security to one to many tables

1-68812

Datagrid Picklist column stores text instead of ID if item length is greater than field length and it is set to store IDs

1-69011

"Object required: 'application.Forms(...)' " occurs when using Application.forms API in the 7.5.1 Sales Client

1-69347

Assigning user to Remote Office location does not apply when the description contains parenthesis

1-69644

Using Oracle 9 the unique index is dropped

- 1-70271**
By closing user profile, it saves changes made in Team tab area.
- 1-71030**
The "Warn before switching to All Groups" on the Options Client View functionality does not work. No warning message opens.
- 1-71209**
Customer request user login activity audit reports
- 1-71312**
Would like to have additional documentation about publishing a report in the SalesLogix
- 1-71721**
Changes to acct ownership are not being reflected in 1 to 1 tables
- 1-71856**
Integrity Checker Errors on Oracle 11g
- 1-71956**
Admin shows error when Adding pick list in Admin
- 1-72182**
FLS changes are not being applied reliably for web users
- 1-72199**
Error: ORA-01858: a non-numeric character was found where a numeric was expected when running Integrity Checker against Marketing (Purge Hist_Lead)
- 1-72324**
Using "Copy Team" includes retired users
- 1-72383**
Application.BasicFunctions.ShowMainViewFromLookupWithConditionByID does not pre fill the search text when the "Initial Text" parameter is filled out.
- 1-72474**
disabling the index schedule would need to disable the trigger as well
- 1-72480**
Admin sets value to blank ("") instead of NULL.
- 1-72600**
Primary Key Logic for Views in a particular scenario
- 1-72628**
Execute SQL in the SP3 bundle to set the DBVersion is setting the version to 7.5.2 and not 7.5.3
- 1-72634**
Attempt to search on custom database index using the Web Client, it displayed error in web client and in event viewer.

1-72723

Cannot drag and drop source field when creating new SpeedSearch index.

1-72724

Cannot Join to that Item - when creating local join in SpeedSearch.

1-72880

Views created in the database that contain a subselect before the FROM clause cannot be enabled in Admin

1-73018

Setting the admin user's default Account lookup to the Legacy QBE view, the setting is not saved but is changed to the version 7.0 active form.

1-73298

Creating a SpeedSearch index containing the field Account.Account can cause the error "Object reference not set to an instance of an object." using SpeedSearch

1-73378

Create Database Properties defaults don't persist

1-73402

A SalesLogix user can login multiple times into SalesLogix at the same time from the LAN or Web clients.

1-73557

SpeedSearch does not highlight the correct word in the results on a custom index

1-73592

SalesLogix Library folders do not sort alphabetically within Outlook

1-73685

it allow blank value when rename team name.

1-73803

Datalink Manager is not case sensitive for passwords.

1-74542

Legacy Upgrade Bundle: Make a schema change in a bundle, can't make a change later in the bundle that requires the first Change

1-74603

"Provider cannot be found. It may not be properly installed" occurs when creating remote database

1-75059

INTL: Multi-byte chars do not display correctly in the admin Users grid

1-75067

INTL: The Admin Region, Division & Dep't edit boxes do not display multi-byte chars properly

1-75111

INTL: Sales Process containing multi-byte chars does not display correctly in the Manage Sales Process dialog

1-75662

Admin: If a profile is updated in the security tab it is not updating in the secrights table

1-75913

Legacy Admin: For new users: Admin record is created for other calendars

1-76042

Admin: If 'Password must contain numbers and letters' is checked and Default password should contain alphanumeric else it should throw message when clicking ok button

1-76059

Web Admin: Getting error message(Passwords must be alphanumeric!) when creating new user in web admin if "Password must contain numbers and letters" is checked in the password options and default password does not contain numbers and letters

1-76085

Error when applying the SP3 upgrade bundle to an Oracle db

1-76554

Deleting an Account or activity in the web client would place the wrong values in the identity column in the IndexUpdates table.

1-76610

Web Client: Performance: Executing a bunch of pluginblob queries(It is querying all groups in the list) when navigating from entities

1-76762

Admin: Team is not displayed in the list if a team is replaced with user, Dept or Team

Advanced Bundle

1-57467

Sales process will not stay collapsed in the sales process grid of the sales client

1-69595

Granting another user's calendar through the RMB Menu does not function the same as the Add User Button

Advanced Outlook Integration

1-48968

Attachment Date should be the date/time of the email with an attachment when an email with a file is dragged and dropped onto Leads

1-48969

Attachment Date should be the date/time of when the email with an attachment was sent to the Lead using SendSLX

1-55872

Outlook 2003 only, email dialog stays open after sending email from Word with Outlook Open

1-58530

"Error accessing database: Failed to parse SQL. If the problem persist, please contact your administrator." error when sending an email to a contact with an apostrophe in the email address and the contact does not exist in SalesLogix

1-64036

When an activity with an attachment is synced to Outlook the attachment should be on its own line and not on the same line as the notes

1-67645

With AOI, a recurring monthly activity only shows on the 16th of the month regardless of the date scheduled

1-67999

Personal Activities in SalesLogix synced to Outlook via AOI do not get flagged as private.

1-71906

Selecting the email icon from Contact Detail does not populate the Email display name in the resulting Email

1-73848

Outlook will not Auto Accept meeting requests

1-76609

Localization - "Set All Users To Standard Role" link does not work.

1-76898

Localization - Some items are not localized when installed Desktop Integration on a client OS without LAN client.

API

1-72581

Incorrect API Reference is still on system after an upgrade to 7.5.2

1-72759

API Ref header incorrect

1-73037

SData sync documentation for API reference

1-76626

Need detailed docs on Send SLX.dlls and the LAN Client for Developer's Reference

API / Platform

1-71706

Any entity updates related events for each Contact entity do not get executed with account.save

Architect

1-47694

Architect ... where an active DateTimePicker control is tied to a database field that has no current value, under Windows XP themes, the calendar dropdown button is not the expected color

1-47978

Architect ... Data binding and events should occur when SetTabVisibleProperty is set to true if the old and new ids are different

1-48000

Architect ... for the active Datagrid, need to include properties window 'help' for the event 'OnGetRowLineCount'

1-48075

"Select Data Path" window opens behind Architect windows when attempting to add columns to datagrid

- 1-48088**
Architect ... for the Navbar, a merge rule of 'Remove' is ignored if used where a Navbar button is first defined

- 1-48270**
Architect ... for the active Picklist control, the 'Select Pick List' dialog is displaying 'Text Types' under the Custom tab

- 1-48271**
Activity 'To Do Result Codes' Picklist default setting being ignored when completing activities

- 1-48317**
Getting multiple errors when performing different actions within a Datagrid.

- 1-48419**
Help button is missing in Database Manager when performing function through Architect.

- 1-48671**
Localization - Hotkey performs the wrong action in Plugin "Properties" dialog

- 1-48713**
User's should not have to explicitly change the order of how Navbar buttons are loaded through client options to remove a button.

- 1-48741**
Unable to create bundle when a project/bundle name contains any of these special characters (? * / \: > < | ").

- 1-48760**
A "List index out of bounds (1)" error is displaying when trying to delete a calculation from a calculated field.

- 1-49328**
Localization - Hotkey doesn't work in "Options" dialog

- 1-49331**
Localization - Duplicate hotkey occurs in Color "Select" dialog

- 1-49358**
Localization - Duplicate hotkey occurs in Color "Options" dialog

- 1-49634**
Architect ... when opening a Project that contains a 'Create Field' action for a field that no longer exists in the database, the action should be dropped and a meaningful message displayed

- 1-49669**
"You cannot open this Plugin with Architect" error when opening any template from within a project

- 1-49670**
Architect ... Projects: expand error trapping to take appropriate action on project items when a table they reference is deleted from the database

- 1-49684**
Application.BasicFunctions.DoInvoke "Function", "ViewCalendarWeek" opens calendar in day mode instead of week mode.

1-49846

Architect - Unable to change the font color using the Font property of a Datagrid.

1-49849

Architect - Unable to change the font color using the HeaderFont property of a Datagrid.

1-49865

Architect - Picklist Manager is giving an Access Violation error when setting default for a Picklist.

1-51188

Architect/ Admin/ Sales Client ... for the Picklist Manager, the icon in the Pick List name field should not be visible when no custom Picklists are defined

1-51783

Manage Plugins - Unable to select group using the shift key when Manage Plugins dialog is minimize mode.

1-52139

Architect - DateTimeEdit control defaults to original settings, after closing and reopening the Plugin.

1-52146

Architect - DateTimeEdit control should have the ability to interpret FormatStrings in Regional Settings.

1-52242

Architect - Docking and Undocking the Add Action dialog causes the Actions list to disappear.

1-52441

Architect: Grid 'Sortable' property affects scrolling for Notes/History tabs

1-52553

Architect - Chart control properties dialog is not being displayed correctly, when user first adds a series to the chart.

1-52598

Architect - Unable to refresh the Sales Client when user is in a Legacy browser control.

1-52600

Architect - Refreshing a Legacy WebBrowser control, then clicking off the form will cause an access violation error.

1-52941

Architect - Calculated Fields: Using a / as a separator on a calculated field generates // as the separator.

1-53038

Architect - Added checkbox column type to Attachment Datagrid does not 'check' on first click.

1-53144

Architect - Navbar/Toolbar: Background color is not being displayed when toolbar is docked to the left as a Nav button.

1-53356

Architect - Application.MainViews.ActiveView.CurrentGroupSQL returns incorrect results

1-53427

Known Issues - SLX 7.5 SP3

8/20/2010

Architect - Not able to create a bundle for a Project when the name contains an '/'

1-53570

Architect - LinkEdit control is not linking to a ticket when text property is set.

1-53728

Architect - VBScript's activity object fails to recognize custom fields added when using intellisense

1-53980

Architect - Picklist: Defaults set for a Picklist is not set correctly when sort alphabetically is unchecked.

1-54275

Architect - Datagrid OnRowSelect event fires multiple times when a datagrid is created at runtime.

1-56830

Linked Field in Contact Process, Database Change is truncated

1-56859

MainAXFormMessageDrop subroutine does not have "Sender" as an input

1-56860

Subroutine MainAXFormFileDrop does not have "ByRef" on the "DefaultProcessing" output

1-56927

Extended character cannot be added to the Function Name of a Secured Function

1-57318

Netforms_plugins records inserted in the ERP Link bundle are not being released to 'Everyone'

1-57380

Sales Process - The Move buttons in the Steps Pane should be disabled when manually selecting a first and last steps.

1-58334

The item in the "Project" dropdown list is truncated in the "Type" popped up dialog.

1-59731

Architect Form - Misspelling in System: Ticket Detail Form

1-59736

Sales Client - Sales Process: An error is displayed when performing a step to call Opportunity:Contacts.

1-60807

Architect - Combo box control will not allow user to enter certain symbols.

1-61278

Architect - Datagrid font color property not changing color of font.

1-62509

Architect - ListView control in SalesLogix 7.0.x and 7.2.x is shortening column widths

1-62587

Known Issues - SLX 7.5 SP3

8/20/2010

Minimizing the Manage Sales Process Dialog in the Architect/Sales Client will cause the Dialog to minimize behind the main view causing the need to click on the main view to bring the Manage Sales Process Dialog to the front to be accessible.

1-63162

Architect - Value in Argument lookup gets cut off when there is a comma in the value.

1-63583

Application.BasicFuctions.CreateDocument error "failed to parse"

1-63741

Error "Invalid Merge Field" when custom field is used in a text box on a template

1-64670

"Error at line: 1, character: 1 Expected statement" occurs when a "|" (pipe) character is in the Script portion of an ActiveX form

1-65161

Adding space in toolbar causes errors

1-65717

Unable to use lookups with different layouts

1-66619

Unable to release a tab to a specific user or team -- Tab releases to all users.

1-66837

OpenDialog Control with MultiFile option only returns last file for 'filename' property

1-67091

In VBScripts (LAN): System: SLX Print Detail, Detail spell as 'Detial'

1-67094

If there is no change to a script or form.....the VERSION number and Create/ModifyData can NOT change.

1-67239

Duplicate ActiveX Form Names: frmOppContacts: Form Closing Bug

1-67295

Architect: Form captions are clearing at runtime in SLX 7.5

1-67385

DB Manager Delete Table vs. Delete View

1-67434

Picklistcombo does not behave as expected; OnChange not pulling current values

1-68632

Error "Exception EOleException: Command was not prepared" when Picklist with onpopup event sets restrictions that fail to return any results

1-68880

When using Application.BasicFunctions.DoInvoke in a form button, print report prompts for page setup every time.

1-69404

"The ' ' character, hexadecimal value 0x20, cannot be included in a name" occurs in Web Client after adding Plugin Types with spaces in the name.

1-69689

Sorting Datagrid by dragged column header only sorts once in one direction

1-69690

Sorting Datagrid by User column sorts by UserID

1-70895

"HideButtonIfReadOnly" property is inconsistent on some fields/forms

1-71137

Architect: Error when opening the 7.5 SP2 sxb bundle through Architect

Architect: Adding a control, bound to a custom Activity field, to the Activity Details View creates Duplicate Activities when scheduling a follow-up

1-76202

ActiveX edit box OnExit event fires when repositioning the cursor if the control is on a panel

1-76376

Architect: Script Errors when opening the Open Opportunities form in Architect

1-76384

Crystal report object created by a button runs a query with no where clause when run after the first time

1-76385

drwtsn32 error sending emails on XP machine

1-76753

Contact Lookup in Add Target Response view can become pre-populated and unmodifiable under certain circumstances

1-76818

Architect: Error when trying to add a Plugin that is not on the local machine

Build

1-68022

Removing a control from a SmartPart design surface that has a UI interaction causes the build to break with a non descript object null call stack error.

1-75264

AA: "Failed to build Sage.SnippetLibrary.Csharp" error building the web platform

Builds

1-76653

The SalesLogix.exe is spelled Saleslogix.exe

Bundle Model

1-58318

Bundle Model: need better logging when bundle install completes; don't have sufficient error handling when items are committing

1-58509

Bundle Model: the 'Add Bundle Item' dialog does not display Forms or Child/ Parent Properties in the tree for selection

1-59606

Bundle Model - Select Items dialog: when installing a bundle, after setting an item's 'Install Action' to DiffMerge, the 'Merge Item' button is not immediately enabled

1-64604

Bundle Model: would prefer a more meaningful message when trying to bundle a business rule that has not been fully saved

1-67305

AA: When adding large folders to a Manifest, there is no indication that the file is in process of being added when dropped into the whitespace

1-67610

AA: include better install check during bundle install

1-67930

AA: New Manifest bundles cannot be saved directly out to a network during the initial creation of the bundle

1-70326

AA - Bundle Model: receive error trying to install bundle containing a 'MailMergeTemplate' Plugin, where choose to release Plugin

1-70975

AA - Changes to a custom Picklist create duplicate entries when applied in Application Architect.

1-71480

AA - Bundle Model: Should be able to open child items from the bundle manifest editor tree view context menu such as entity properties and portal modules

1-72101

When creating a bundle by project differences only differences in default resx files are detected, therefore those for alternate culture are not included

1-72102

During a bundle install, it is only possible to merge differences in default resx files and not those for alternate cultures

1-72153

AA: Bundle Model: error on deployment after installing custom bundle and building the web platform

1-72236

AA - Bundle Model: when creating a manifest by project differences, would not expect all entity properties to be included when a couple new properties have been added to an entity

1-72341

AA - Bundle Model: application exception trying to save bundle to network drive

1-72934

AA - when bundling a Picklist, include an option to 'Replace Target List' as in the LAN

1-73174

AA - when bundling a Picklist, include an option to 'Replace Target List' as in the LAN

1-74276

AA: Not able to install 7.5.2 Web HF03 VFS Upgrade.zip on 7.5.2 RTM through file system

1-75359

AA - Manifest: when adding SlxClient portal to a manifest, receive error that Id is not unique

1-75667

AA - on installing a bundle with Plugins, for the 'Release Plugins' dialog, 'Everyone' may incorrectly be chosen multiple times

1-75975

AA: When creating a new Manifest, expanding the item tree views causes asterisks to appear, as if the manifest has been updated

1-76181

AA - bundle manifest name not immediately apparent on saving

1-76867

AA: Applying a bundle with relationship conflicts delete the conflicting relationship

Crystal Reports

1-49766

Architect - An error occurs when a user cancels out of viewing a Crystal Report.

1-50321

Web Client: Reports when clicking for the Extended properties form is thrown to bottom of browser

1-50322

Web Client: Extended Filter Options in the Reports starts on the left edge

1-50879

Web Reports - Remote Web Reporting Server - UserName is passed ClearText Password is passed Encrypted in URL

1-55703

Avery 5163 label prints city/state/zip different than rest of address

1-67517

Error ADO Error Code: 0x; Source: SalesLogix OLE DB Provider; Description: Incorrect syntax near keyword 'CONVERT'

1-69992

Web: Crystal reports are not displaying Unicode with Web Reporting

1-72662

Crystal Reports: Crystal Reports Sever XI R2 Emb edition SP3 The install registers the wrong version of .Net assemblies

1-75256

An error has occurred in the script on this page.

File:///C:/Documents%20and%20Settings/webdll/Local%20Settings/Temp/prompting1.html. Do you want to continue running scripts on this page?

1-76011

Right edge of Account Detail report cut off when exporting to PDF

1-76214

"Data could not be loaded from the DB" error occurs in Crystal Reports when using a group that has two joins on the same table.

Customer Portal

1-51907

Web: After adding and submitting comments for a ticket in Customer Portal, the comment remains in the textbox

1-51961

Web: Regional settings are not consistent in IE6 and IE7 for Customer Portal

1-51962

Web: Regional settings are not consistent in IE6 and IE7 for Client

1-52075

Web: Splash Screen is missing "Customer Portal" description

1-55721

Web: Customer Portal Print Preview does not have an icon/link to return the user back to the Ticket

1-55728

Web: Clicking Save File button in a tickets Attachment tab returns a general error when a file is not selected

1-56609

All urgency levels appear when adding a ticket through the Customer Portal.

1-56833

AddTicketActivity error message has a misspelled word

1-58631

CUSTOMER PORTAL: When the Customer Portal checkbox is set to FALSE in the Edit Area / Category / Issue dialog, the

ACI is visible in the Customer Portal.

1-59288

Web: In SLXCustomer Portal while creating a 'New Ticket', The User will notice under 'Add Portal ticket' some unnecessary spacing separating the titles and their text fields.

1-59545

Web: The User is Unable to select 'Windows 98' when creating a new ticket from within Customer Portal.

1-59598

Customer Portal cannot be accessed in a legacy website on a 7.2 system

1-63468

Web: In ticket detail view the Status field is editable.

1-63476

Web: Fields go on passed the page in print preview of Ticket Detail in Customer Portal

1-64754

Web: Customer Portal Error Reopening closed tickets for contact Paul Banks

1-70626

Web: The link to this help topic is obsolete.

1-71173

Web: Slx Users are not able to grant Contacts access to Customer Portal in the web, only in LAN.

1-71254

Web Customer Portal Lookups do not return proper results when searching on a custom field

1-71311

Web: Customer Portal help menu cut off in IE8 with compatibility turned off.

1-72665

Customer Portal Ticket.aspx failure.

1-73543

Customer Portal syntax errors when datetime picker readonly = 'false'

1-73598

Contact Name does not change for Ticket Details in Customer Portal

1-74930

Records are not sorted when attempting to sort using the column headers

Customer Service (LAN)

1-67998

LAN Send To of a Ticket email is not populating correctly.

1-68863

LAN: In the Ticket Detail view, the Needed Date and Assigned Date field do not display the calendar icon until focus is put on the field by clicking into it.

1-72995

LAN: When the Defect Status option Open is deleted from the Defect Status Picklist, then Insert New Defect is selected from the Ticket -> Defect tab view, an error occurs.

1-73046

Web: EVAL. In the Eval database, the Issue option; Cannot Connect incorrectly displays as Cannot Connect.

1-73636

Contradictory information provided in Help topic regarding the inclusion of internal comments in emails sent via a ticket.

1-74025

When the "Issue text must match a list item" option is enabled, certain combinations of Area/category/Issue will not save in the LAN client

1-74087

Code in Insert New Ticket form shouldn't be setting the email address variable when Do Not Email is checked on the Contact Record

1-74543

When the "Issue text must match a list item" option is enabled, certain combinations of Area/category/Issue will not save in the LAN client

Customer Service (Web)

1-50814

SpeedSearch - Icon Tooltips

1-52887

Web Client - Insert Ticket and Ticket Detail view - Date/Time Picker tooltip should be "Calendar"

Dashboard

1-64274

An error occurred executing active form script (Sales Dashboard: Open Opportunities) Error in include script (Dashboard: Content Set Support): Error calling method AXForm Open Overflow 'CInt' at line 2596, char 11

1-67707

Pipeline Status Analysis View - Opportunity Status filter does not allow editing.

1-72686

An error occurred executing active form script (Sales Dashboard: Sales Analysis View) Error calling method AXFORMOPEN Cannot focus a disabled or invisible window At line 28, Char 5

Database

1-39620

There are 2 SQL Statement that are run when a user logs into the Sales Client.

1-52816

SQL view prefixed with SLX_ does not appear in Database Manager.

1-53368

SQL SUM statement returns one value in SQL and another in SalesLogix

1-55749

Unique Constraint on Primary Indexes get removed (or fail to get recreated) when deleting a field or running the SalesLogix v6.2.x to 7.0 Upgrade.sxb.

1-58604

Offensive data in account note/history record must be removed

1-61769

Dependent views cause Remote database creation to fail

1-67288

When you put in Special Characters on the DB, within Families, you get an error.

1-71961

PICKLIST Table - Duplicate ITEMIDs need to be fixed in EVAL & BLANK Database

1-72481

DB: The UserInfo.AccountingUserId is joined to User.AdminRole and should not be

1-72818

Import Users from Windows option in SalesLogix Administrator sets USERSECURITY.Enabled to 'Y' instead of 'T'

1-72963

SQL Index Script - two clustered indexes on HIST_LEAD_ADDRESS

1-74531

Performance - The call to Sage.SalesLogix.Security.GetRoles() is not cached, causing the UserRole table to be queried with each page view. Add an index

1-75958

Bad data in the Eval database "Paradigm dropped their drawers to get the deal.....Will f/u in a couple months..."

Differencing Utility

1-72841

FormDiff: Utility returns "Object reference not set to an instance"

DWC

1-67324

Web: Disconnected Client: Display issue in Firefox on Reports page with Edit>>> options displayed

Entities

1-50184

Quick Forms Designer: unexpected layout of elements chosen for a form

1-50250

Quick Forms - TimeZone control: the ToolTipKey property does not appear to be working as expected

1-50269

Quick Forms - TimeZone control: not sure that this control is working as expected

1-50368

Quick Forms - Duration Picker: the HotKey property appears to be ignored

1-51095

Quick Forms - Label control: with the AssociatedControlId property specified. clicking on the label does not shift focus to the control with the given Id

1-51135

Quick Forms - Datagrid DateTimePicker column type: where 'DateOnly' is set to true, one unexpectedly sees the time displaying in addition to the date

1-51291

Quick Forms - Datagrid control: the User and Owner column types should display as text

1-51784

Quick Forms: when some special characters are used in a form name, the form will not save as expected

1-51801

Quick Forms - Columns: the width of the columns in the web client appears the same, regardless of the SizeType specified

1-51802

Quick Forms - Rows: the height of the rows in the web client appears the same, regardless of the SizeType specified

1-52312

Quick Forms - Datagrid control: implement the ConfirmationMessage property for the 'Delete' column type

1-52515

Quick Forms - Address, Owner, WebAddress, User elements: would expect the appropriate control type to be chosen when adding these elements to a form

1-54317

Quick Forms - Datagrid control: when the Link column type sets the active tab, after linking the tab chosen is in focus, but no data displays under the tab

1-54797

Quick Forms: where an edited textbox has an associated OnChangeAction that displays a message, after pressing the form button to save the entity data, the edited data does not display

1-54868

Quick Forms - Datagrid control: should be able to change the column type and retain any common column properties

1-55110

AA: Columns collection in Child Relationship properties grid should be read-only.

1-55328

Application Architect - Quick Forms are displaying as unsaved when switching from local workspace to VFS

1-55522

AA: Need references in code editor for intellisense.

1-55668

Underscore dropped from table name in Application Architect

1-56440

Project tree - quick forms: unexpected behavior when try to 'delete' a form that has not yet been saved

1-56642

AA: Entity: Child Properties should be sorted

1-58974

If a new relationship created by right-clicking "New Relationship", it defaults the relationship property names to "property"

Entity

1-59361

Quick Forms - Copy control: remove the Enabled property

1-59721

Error message occurs when user attempts to add to the KeyProperties Collection for an entity

1-59816

AA Collection Editor from an entities Properties Pane returns an error when user attempts to Add a property

1-63186

Unable to change the sort type of a pick list in the Web Client.

1-63360

Quick Form UI should be more cognizant of allowable binding and relevant control types to use

1-63716

Page module that allows one to 'hide' forms for MainContent workspace: MainContent unexpectedly draws toolbars for the hidden smart parts

1-63717

Page module that allows one to 'hide' forms for MainContent workspace: GroupNavigator control throws errors when it exists on a number of 'detail' forms

1-64169

After building, asterisks appear on form tabs giving the impression the changes made were not saved the first time

1-64287

Quick Forms - Controls: 'Required' property is not working

1-64372

Remove image called "Copy_16x16.png"

1-65316

Quick Forms - Datagrid control: research use of C# Snippet Editor with 'Custom Format' column type

1-65556

AA - Lookup Control Setup Wizard: for a 'DropDown List' display, for the property value chosen for the drop down list, include a warning if property value has incompatible type to bound data type

1-66114

Table Property and Display Names are not consistent in camelcase for all of their fields

1-67341

AA: When Generate SData Feed is checked and a Path Name is not specified, an un-descriptive error message is displayed

1-67447

AA: New Tables and Fields

1-67499

AA - Quick Forms: for controls with associated actions, not all items are copied over after a cut/ copy and paste

1-67583

AA: OnBefore and/or OnAfter Change Events do not appear to be available after deleted

1-67751

AA - Horizontal Separator control: Caption Alignment not displaying caption in expected position

1-68245

Web: An address change for a new account does not produce the "unsaved data message"

1-69020

AA - Code Snippet Action Item: trying to set the 'Enabled' property for a bound textbox does not work

1-69211

Setting the visible property to false by code does not remove the caption of the property.

1-69405

AA - Business Rule: problems adding reference to default business rule

1-69413

AA - Summary View: property displays in unexpected position and with no caption

1-69588

TAI Redirect to a list view from the detail view does not refresh the group data for the detail view

1-69683

AA - Quick Forms ... Data Grid control: Columns collection DataField property dropdown does not display values for items via a relationship

1-69782

AA - ChangeManagement validating on the Entity OnBeforeInsert will not work on Insert Account/Contact if both Entities Validate

1-69803

Unable to hide tabs in Whats New module like other smartparts

1-69917

AA - Quick Forms ... Datasource: would expect to be able to display calculated fields in a datagrid column, where datasource Use Smart Selection is True

1-70181

AA - entities: when model loads any property with a data type of 'Text' and length of approx. 2 billion, should be updated to a data type of 'Memo'

1-70223

AA - Quick Forms: entity property 'data type' properties not reflected when property is added to a quick form

1-70232

AA - need instructions on how to customize (add a tab) ActivityViewer.ascx (7.5.1 onwards)

1-70264

AA: When using the New Form Wizard and adding properties, clicking Select All and unselecting specific items does not remove from form

1-70712

Dynamic Web Content Control does not allow access to child properties.

1-70873

AA - Lookup control not working as expected when prefiltering by an enum datatype

1-71021

AA - Entity Properties: property name and display name are being set or reset inappropriately per scenario

1-71321

AA: Audited property not working as expected ... LongNotes field in the History table is blank

1-71482

AA - Intellisense in QF code snippets is missing documentation on most IForm members

1-71792

AA - Numeric and currency controls not responding to 'Tab' key in Firefox

1-72029

AA - receive web client error trying to open form with grid, where datasource references custom property

1-72038

AA - Changing some entity filter properties does not mark the model item as changed.

1-72055

RC2 - Error creating M-1 relationship to User in RC2 - ArgumentException

1-72068

AA: Cascade setting on a relationship is updated on the Properties but the MDI continues to show the original value

1-72108

AA - Button control: the 'Image' property is incorrectly displaying as a second 'Button Type' property

1-72114

When creating a new entity with a new table as an extension entity the table is always created as secured

1-72305

AA RC1 - Fail to cleanup .xml file and Sage.SnippetLibrary.CSharp when removing an Action From a Quick Form

1-72655

Customer: Marshall Technology Sol Inc.: error trying to save Account Manager Lookup value to custom Account field Test_User_Id (SLX Standard ID)

1-72690

AA - Entity Wizard breaks if file permissions not set correctly

1-73038

AA - Quick Forms: for a Datagrid control, Row Select falls out of place when columns are sorted

1-73074

AA - QuickForms: deleting a button from Form2, that was originally copied/ pasted from Form1, removes the script associated with the button on Form1

1-73107

AA - Quick Forms: for a datagrid control with a Row Selection Column, any defined confirmation message is not appearing in the client

1-73178

AA - QuickForms: deleting a button from Form2, that was originally copied/ pasted from Form1, removes the script associated with the button on Form1

1-73180

AA - Quick Forms: for a Datagrid control, Row Select falls out of place when columns are sorted

1-73181

AA - Quick Forms: for a datagrid control with a Row Selection Column, any defined confirmation message is not appearing in the client

1-73195

One-to-one tables created in the Application Architect do not have a SECCODEID field like those created in Database Manager

1-73303

Users can right click and paste values into a restricted pick list

1-73391

AA - Quick Forms: only the Visible tabs should be loaded when moving to a new record (in middle pane and the tab that is 'active'), not all tabs previously touched.

1-73489

AA - HQL Data Source: on the ProductPackages form, a grid 'Edit' column is not functioning as expected

1-73656

AA - MultiTab lookups are not accessible to other lookups

1-73744

AA - Unable to change checked status via script on Web Checkbox control.

1-73749

AA - "could not resolve property: 'TableName'Id of: Sage.SalesLogix.Entities.'TableName' at System.ComponentModel.ReflectPropertyDescriptor.SetValue..."

1-73939

In the web client when the second dialog screen launched from the first dialog screen is closed, the controls on the first dialog are gone

1-73967

AA - C# Code Snippet (Obsolete): possibly Intellisense wrong for GetById

1-74053

AA - Code Snippets: all OOTB code snippets should have XML comments

1-74456

Adding a Multi-Tab to a form in the dialog workspace affects the width of the columns on the form

1-74568

AA - Address.OnBeforeUpdate event does not fire with the AccountDetails Address control.

1-74601

AA - HQL Data Source: when try to create a query that only contains one column it will fail

1-74850

AA: Extension entities are queried when loading Details SmartPart, even when no properties are being used

1-75010

AA - Issues trying to display DivisionalManager filter for Opportunities in the web client

1-75278

AA - where 'Audited' is enabled, Account Manager/ Owner changes do not log to the History table

1-75623

AA - Message does not fire for Insert Contact checkbox change event.

1-75959

AA - where grid's datasource uses custom property with a return type of IList, receive error in web client

1-76215

AA - Quick Forms: need to add error handling around form actions so that a corrupt code snippet action does not prevent the form from opening in the AA

1-76229

AA - Hql Data Source: not working as expected with a ComboBox control

1-76231

AA - HqI Data Source: not working as expected with a Radio Group control

1-76290

AA - Datagrid OnRowSelectedAction: for a business rule, the generated code references the parent entity instead of the child Entity

1-76329

AA - Filters: property changes made to a filter, where filter is only highlighted in the project explorer tree, are not saved

1-76380

"Unable to load file, '\Entity Model\SalesLogix Application Entities\ENTITY\RULE_NAME.method.xml'.
(Sage.Platform.Projects) Object reference not set to an instance of an object. (Sage.Platform) "building the Web Plaform

1-76381

AA - Web numeric control is not applying formatting as the help file indicates it should

1-76548

AA: Link Control - if property Destination is left blank, one sees an error in the web client

1-76549

AA - Link Control: one may databind to the Destination property, however the databound values are ignored in favor of the Destination value defined at design time

1-76550

AA - Link control: error in web client trying to set the Destination property at run-time using the form OnLoad action handler

1-76565

The Disconnected Web Client install should install the Sage SalesLogix Desktop Integration Module

1-76566

AA - ComboBox control: on copying/ pasting this control to a different form, the Items property is not copied over

1-76624

AA: Updating the Characters property on a filter does not get flagged as a change

1-76756

Phone number does not copy from SalesLogix into TAPI application and it does not dial

1-76772

Contact Lookup in Add Target Response view can become pre-populated and unmodifiable under certain circumstances

1-76793

AA - Quick Forms: receive duplicate key error trying to use intellisense for code snippet where combobox Control Id is 'Name'

1-76834

AA: QF designer doesn't size columns properly using percentages at different sizes.

1-76835

AA - Quick Forms: some column sizes cannot be sized correctly

Entity Designer

1-69678

Inconsistent entity control selection

1-69748

Dependency Lookup high level type needs properties updated to match Dependency Lookup control

Entity Model

1-67301

Web: Picklist fields with both 'Allow Multiple Selections' and 'Item Must Exist' = true allows data to be typed in and saved.

Export to Excel

1-60010

Web: When you export a group to excel and they have a birthday attached to the account, the formatting is wrong on the excel sheet.

FindOrphans

1-71836

AA - FindOrphans utility finds a business rule method and code snippet that do not appear to be used for form OpportunityCompetitors

Forms

1-64685

The "Adding a Field to a Form" topic does not contain all the steps from start to finish for adding a field to a form.

Forms Designer

1-48777

Admin Shell - Quick Forms: where multiple pages exist for a single entity, the specific page referenced in the portal navigation item should be opened in the web client

1-49339

Quick Forms - PickList control: the HotKey property appears to be ignored

1-49349

Quick Forms - PickList control: a Required property value of 'True' appears to be ignored

1-49403

Quick Forms: it may be appropriate to add the 'Required' (and RequiredMessage) property to many more of the control types

1-49502

Quick Forms - DateTimePicker control: the FormFocusField property appears to be ignored

1-49867

Quick Form Designer: where vertical arrows display, after deleting a control, form scroll position is not retained, and first form element is visible again

1-51877

Quick Forms: form designer considerations

1-53047

Quick Forms: how to handle control properties that appear in the Properties window solely for use via the DataBindings property, and wouldn't be used alone

1-53190

Quick Forms - control with IsReadOnly property of 'True': if one selects the text, then presses 'Backspace', one is unexpectedly returned to the listview

1-53862

Quick Forms - Button control: 'Click' is set as a button's bindable property, but it does not display for the button control

1-55655

Quick Forms: when a form closes, the properties pane should become empty

1-59199

Quick Forms - Datagrid control: for certain grid column types, the control is partially cut off at the bottom

1-59772

No data found when binding non MainEntity ID to datagrid.

1-64792

Saving a Quick Form doesn't save the string resources for all cultures

1-67482

Missing tooltip on ChildRelationshipPropertyName property of Insert Association Action

1-70818

Column Style settings do not function as designed.

1-76066

Performance - Dialog Workspace transfers large amounts of data on each postback

General

1-75054

The SalesLogix Contacts do not remain in the Check Name list in Outlook

1-72575

add paths for windows vista, 2008 and 7

Help

166773

Bevel style on MultiTab control may or may not be implemented

1-69495

Broken help link due to VFSExplorer.chm deprecation.

1-72745

"This program cannot display the webpage" error occurs when opening "Deploying the SData portal"

1-76823

AA: Help button in the Collection Editor dialogs do not load help file

Import Wizard

1-69070

Known Issues - SLX 7.5 SP3

8/20/2010

Import Wizard is not properly recognizing a semicolon as a delimiter in a csv file

1-69619

Import Wizard is missing Opportunity_Contact and Opportunity_Competitor tables

1-71131

Import Wizard does not import all of the sample data provided in the Imp_Acc_Con.csv file

Insert C/A Wizard

1-54849

Save & Clear unlocks entire Insert C/A form after using to Insert an Account only

Installs

1-52050

Installs...A list of files are time/date stamped incorrectly after Remote Office Install.

1-55702

Upgrade of Web Host adds an additional Registry entry for the 'default' webhost port of 3333 even if different

1-63430

Web Host Install cannot be run in silent mode

1-64615

Registry entry remains after uninstall of Web Host

1-66792

7.5.0 Sales Client Install experiences error when installing on a 7.5.1 patched Admin Tool & Servers machine

1-70515

SLX Client OLE DB Provider files are not installing when certain Typical and Custom installs are performed

1-70678

Hot Fix Applied to Network Build does not Function when Copied to CD

1-71745

Localization - Strings not translated on Confirm dialog (Installs)

1-72048

Support Info for SalesLogix Components in 7.5.2 incorrectly shows 7.2 SP2

1-72106

upgrading 7.5.1 Administrator with Intellisync Web Portal, no .Net 3.51, installer not warning the user to install Net 3.51

1-72367

Web: AA may not run if installed separately after Admin Tools & Servers

1-73139

SLX 7.5.0 SP2 SLX Sales Client Patch Installs Intellisync when it should not

1-73413

SLXIntellisync.zip file is not getting copied over to "C:\inetpub\wwwroot\SLXIntellisync\downloads"

1-73491

Localization - FRA&DEU: Intellisync client is not localized in SLX v7.5 SP2 (LAN and Web)

1-74544

'Not Found' error in the Status Window when running the InstallShell

1-75532

Sales Client install should not attempt to install any Outlook pieces when the 64-bit version of Outlook 2010 is installed

1-75821

Web: In add remove programs the Publisher is still Sage Software, Inc.

1-75826

Product name is incorrect on some files updated in the 7.5.2 SP3 Patch.

1-76153

The automated install does not change the ADO Connection to the correct parameters entered during automated install creation.

1-76529

The Disconnected Web Client install should install the Sage SalesLogix Desktop Module

1-76587

Augusta install should not include Mobile 5.1

1-76673

Modify the Copyright information for Sage.Common.Syndication.dll

Integration Contract

1-75753

Text getting cut off in grid column on GCRM endpoint setup view

1-76076

Error when deleting an Endpoint from the Accounting Integration View

1-76077

Error when editing an existing endpoint from the Accounting Integration view

1-76081

It is possible to have the Account radio button and other options selected at the same time in the Link to Accounting dialog

1-76084

More than 1 accounting system has been detected even though only 1 end point has been identified.

1-76086

An empty screen appears after selecting the 'back' button from the Search for Results for ERP dialog

1-76088

An empty screen appears after selecting the 'back' button from the Search for Results for ERP dialog

Known Issues - SLX 7.5 SP3

8/20/2010

1-76089

Error appears when attempting to sync from the account detail view

1-76091

It is possible to link the same account to the same end point more than once w/o any message

1-76092

The details on the Link to Accounting page where the end point is selected needs to be lined up

1-76101

Invoice data feed does not display currency correctly

1-76102

The grids in the Invoice real time data feed are not sortable

1-76103

Dates in Invoice data feed are displayed differently than other areas within SLX

1-76115

There is no icon for Integration Setup in the administration section of the NavBar.

1-76116

The Accounting Integration page to add Account end points does not appear as defined in the wiki mock ups

1-76118

The Setup Accounting Integration dialog does not match the wiki mockup

1-76119

The Test Feed button in the Setup Accounting Integration doesn't work

1-76126

Object reference error when attempting to link a record with no end point defined

1-76203

Error message appears if adding Display info w/o Accounting Feed info and then attempt to save

1-76205

Error message appears if adding Display info w/o Accounting Feed info and then attempt to save

1-76212

It is not possible to sort using the User Name column in the Accounting Systems grid. All other columns are sortable

1-76213

The Turns of Synchronization, Linking and Transacting option doesn't do anything

1-76223

The Integration column is missing from the Accounting Systems grid

1-76248

Linking Wizard not handling unavailable server

1-76251

Documentation - Please hook up the help on the Accounting Integration Detail view and tabs

1-76252

Documentation - Hook help to the IC tabs in the Account Detail view

1-76544

Documentation: Hook help to the Setup Accounting Integration screen

1-76546

Documentation: Hook help to the Linking Wizard screens

1-76556

Error when changing the interval dialog within the Synchronization tab

1-76559

Changes to any of the Matching criteria are not saved after being committed.

1-76560

It is not possible to see all criteria once the rows fall outside of the dialog box.

1-76561

None of the columns in the Matching tab of Integration Setup are sortable

1-76567

There is no Account group that indicates which Accounts are linked to an Accounting System

1-76568

No reference appears in the Account/Accounting tab for a linked acct records

1-76569

Error when selecting 'Check Prices' from within the Accounting Tasks pane of a Sales Order

1-76572

Radio button is not centered

1-76617

Promote vs Linking

1-76618

The Link to Accounting - Select an Accounting System is scalable

1-76619

A Blank dialog appears after choosing Refine or Expand search for an existing account

1-76620

SData refresh issue occurs at times when linking accounts

1-76621

Linked successfully dialog looks cluttered and is not centered

Known Issues - SLX 7.5 SP3

8/20/2010

1-76622

Phone and Fax fields are not synced to ERP from SLX when the account does not exist in the ERP system

1-76651

The Web Configuration file is not loading new quick forms so we can't hook up help

1-76677

The dialog box that contains the minutes for sync interval is too large and the minutes label bleeds over to the next line

1-76685

The Last Update field in the Accounting grid is not populating

1-76735

Adding new records to ERP requires a full sync in order for the data to appear on the other end point

1-76748

Sales Order views and entities missing from model

1-76750

The current opportunity product dialog in IC does not match the mock-ups on the wiki

1-76752

Successful messages in IC Sales Order do not include an OK button to close

1-76764

Merge Data values are not displayed in the Link to Accounting - Merge Data dialog

1-76766

No difference appear during matching even though a field is different

1-76777

Test Feed Status response is barely visible

1-76779

Changes in the matching resources revert back to the default after being saved.

1-76787

Commodity Group Adapter Broken

1-76788

Handler not found for emails adapter

1-76937

GCRM adapter not returning list of available resources.

Intellisync

1-59217

Outlook subject is truncated to 64 characters after completing an instance of a recurring activity in SLX and then running Intellisync

1-59219

Outlook subject is truncated to 64 characters for the remaining instance of a recurring activity after completing all other instances in SLX

1-68748

When user creates a multiday event in outlook and sync it to SLX via Intellisync there is an additional day showing on the small calendar in SLX>

1-69291

When a user sync a large volume of data such as 14902 Outlook records a Stack Overflow occurs which results in Intellisync Client terminating prematurely.

1-72688

Web: Unable to reset SyncSalesLogix Sync Group in Web Client

1-72920

A new contact created in Outlook will not sync to SalesLogix and on the next sync it is removed from Outlook with custom entity added to Web Client

1-72931

Create a Contact in Outlook with a apostrophe in the Company name and Sync to SLX via Intellisync and an error will occur.

1-74359

Default Deployment contains files deployables.manifest.xml and dynamicmethods.xml in the Model.

1-74624

XML Error. Error attempting to load timezone W. Europe Standard Time when running Intellisync

1-74718

When user does not have Edit/Write access, Intellisync can still create Contact from Outlook.

1-76456

When attempting to set up Intellisync with Office 2010 an error occurs.

1-76467

Intellisync History Filter option needs to be added to turn on or off history table syncing.

1-76784

Intellisync - need to provide Alias for customization to work properly (Provider Extension)

International

1-73508

Web: Time zone not getting defined when viewing a detail report

Lead Capture

1-51059

Web: Lead Capture page is missing a default "Tell us about Your Company" image

1-53020

Web: Required field message on LeadCapture page distorts alignment. Becomes difficult to differentiate between labels

Lead Import

1-51085

Web: Lead Import Company Info page has extra spacing between text and corresponding textbox

1-51694

Web: Lead Capture fields with ellipses do not populate textbox when pressing Enter key

LeadImport

1-66473

Web: Lead Capture Pin# and Pager fields are no longer relevant

1-70826

Web> Import Leads - Save Template - The help button is displaying the default page, should be linked to leadimportsavetemplate.htm

Licensing

1-64523

AA: An unhandled exception occurs after the invalid license message is displayed when logging into AA.

Localization

1-76941

INTL: Application Architect should localize, or not, based on the o/s culture - currently it does not

Login

1-54852

'Cannot open connection to DB' message appears when incorrect password is used to access AA.

Mail Client

1-48609

Localization - Error message displayed when using ALT key on Mail Client options

1-48714

Localization - Duplicate hotkeys occur in "Servers" tab of "SalesLogix SMTP/IMAp4 Options" dialog

1-48936

Dialer - activity button does not work

1-49079

Localization - Cosmetic issue on localized Mail Client about screen

1-49112

Localization - Hotkeys not working on TFORMADDRESSPROPERTIES

1-49522

Error when selecting multiple mail client options one after another

1-51101

Localization - Error message pops up when clicking form in the "SalesLogix Mail Client" dialog

1-52123

Localization - "Remove server copy after, in days:" should be grayed out on "SalesLogix MAPI Options" dialog

1-52124

The Escape button doesn't work in the "'SMTP/IMAP4' Mail System" dialog

1-52430

"Apply" button not working on "SalesLogix Extended MAPI options" dialog if user then clicks Cancel

1-52646

Mail Client: when sending an email from SLX the new email is not in focus

1-57207

LC: SLX Mail Client message needs correction

1-58339

There is a truncation in "Mail Client Option" dialog.

1-59494

When you set the options within Mail Client, then close down the application, then reopen it the checked service is unchecked.

1-66757

User cannot open email attachments if they are not the user who sent the email.

1-75910

In the SalesLogix Mail client when selecting Notes and selecting to cache password, the password is written to a cfg file as straight text (not encrypted)

Mail Merge

1-74761

Image in Outlook signature does not display during mail merge

1-74762

When performing a mail merge to a Lead the Schedule Follow-up Activity option on the History tab in the mail merge screen is Disabled

1-76060

Failed to retrieve data from the database. When previewing address labels.

1-76217

The Web Complete Activity form is not using the same Regarding and Category picklists as the LAN Client when running and completing a Mail Merge.

Main View

1-76264

Word deprecated is misspelled: 'Deprecated in SData version 1.0'

Manifest

1-54163

AA: Applying a Bundle with Child Relationships allows you to end up with duplicates

1-60704

AA: When Bundle Models are created simultaneously, same name is assigned to both

1-72273

Installing an entity in a bundle will replace the entire existing entity.

1-72274

When installing a bundle, marking a bundle item for DiffMerge without actually merging anything will not let the install continue when the bundle item is unchecked.

Marketing

1-47915

Sorting the campaign targets "Preview" grid will blank all the records

1-49461

When creating a campaign response for a lead the 'Lead' radio button isn't selected by default

1-55470

When adding a group that contains 60,000 contacts or more to a campaign, an error occurs and it fails to add the group to the campaign

1-55471

When adding a group that contains 60,000 contacts or more to a campaign, an error occurs and it fails to add the group to the campaign

1-55739

The 'How Many?' button in campaign Manage Targets view may not return the correct record count

1-55744

EmPulse is not releasing memory

1-68375

EmPulse Resends Campaigns with Pound Sign When There is a Communication Failure

Mashup Model

1-73019

AA - Mashups convert date functions such as month() into extract() functions that will not work on Microsoft SQL Server

Mashups

1-73960

AA - Mashup dot notation bug

1-73965

AA - Mashups: included OrmEntity primary keys do not contain data

1-74051

AA - Mashups: cannot navigate in both directions with bidirectional M:1 relationships

Monitor Console

1-50898

Monitor Console shows History incorrectly with multiple servers

OLE DB Provider

1-49757

Provider slx_GetServerList Stored Procedure fails sporadically

1-64043

SQL Statement with joins in parenthesis fails to parse in the provider

1-65011

Redeployment of PluginWrapper.DLL requires all SalesLogix applications to be restarted

1-66011

Security Wrapper statements not limiting correctly in groups with OR statements

1-67234

In Data Link Properties it is displayed Test Connection succeeded with out selecting any Initial Catalog

1-72289

Call for separate documentation for 64 bit installs

1-72389

Modify Left Outer Join in OLEDB provider

1-72668

"Faulting application KS_Edit.exe, version 2000.7.0.8, faulting module SLXDBEngine.DLL, version 7.5.2.2151, fault address 0x000504f6"

1-72828

Need the ability to specify a condition for a join

1-73052

SLXSystem can hang under heavy loads due to an abandoned critical section

1-73167

OLE DB provider no longer handles custom functions

1-73441

Getting Application Error message in event log when after building web client on 2008x64 environment and on 2008R2x64

1-73515

The memory consumption of w3wp.exe grows until it's out of memory when the SLXOLEDB provider accesses any DBTYPE_LONGVARBINARY database field (e.g. PLUGIN.DATA).

1-74007

The provider is unable to use the EXEC or EXECUTE keywords for the execution of stored procedures.

1-74730

A change to a currency field is not handled properly by the provider when building up the deleted recordset for the provider Triggers

1-75757

Web: Filters - no data in the "Returned By" and "Ship To" filters for returns

1-76942

Return a better error message when the OLEDB Provider does not have rights to save the Provider Extensions

Opportunities

1-60192

Web: The Opportunity Summary tab is spit out onto two lines.

Opportunities (LAN)

1-58599

An error occurred executing active form script (System:Update Multiple Opportunities). Error calling method btnUpdateGridClick

1-62576

If you set default products on the Web Client (Options) they don't show up when in the LAN client.

1-67794

The multi-part identifier A4.INQUIRERID could not be bound.: The multi-part identifier A4.REGIONALMANAGERUSERID could not be bound

1-68398

When adding a opportunity and choosing closed/won immediately, it does not appear in the 'Sales' tab on the Sales Dashboard if you use the filter where the start/end period is today's date

1-68414

Multi-step operation generated errors message when Opportunity Probability picklist Item field contains text

1-68447

Mail Merge documents are not showing on the Attachments tab until a refresh is done

1-68596

Repeatedly Clicking Sales Process Checkbox Produces Error

1-72056

Click on copy info to e-mail on the Opportunity Snapshot opens Outlook and when you send e-mail it add white space/breaks between each line of text.

1-73567

Cannot remove more than one contact at a time from an opportunity

1-74541

Cannot remove more than one contact at a time from an opportunity

1-74759

ExchangeRateLocked field being blanked out when adding products in specific scenarios

1-74760

Modifying exchange rates causes opps to be updated which shouldn't be causing data discrepancy issues.

1-75143

The Opportunity.ResellerID is not updated when Accounts are merged

Outlook

1-67008

Outlook 2007 address book does not add ad-hoc group name

1-68917

Vista Enterprise only: "Error in TwebFIOManager.OutlookSentHandler. The system cannot locate the resource specified."

Outlook Integration

1-68443

"Complete E-Mail for CONTACT" form has Help button in focus

Personal Web Server

1-65689

Firefox - Text alignment with radio buttons on What's New page

1-65756

Disconnected Web: What's New page - deleted accounts still showing up as available for subscription

1-66594

Disconnected Web - Refreshing the What's New page with F5 does not remember radio button selection

1-67152

Disconnected Web - date format set by date picker changes when clicking search

1-67802

Disconnected Web - login does not restrict access to database owner and admin, anyone can login

1-71404

Personal Web Server About window shows empty box.

Portal

1-63910

AA: Warning appears each time user edits the Service Type or Register As properties for a service

1-64675

AA: New Portal Wizard closes itself prior to completion if Description field is left empty

1-65062

AA: SData portal in the Core Portals deployment is displayed in all lowercase

1-66541

AA: The Open Portal button does not return an informative message for a File System deployment when webdev.webserver is not found

1-67099

AA: "System.IO.IOException was unhandled" occurs when editing ascx file per scenario

1-67156

AA: Portal Page wizard for a new Portal does not complete after validation fails and requires terminating the program

1-67627

Web: Unable to precompile the slxwebprt portal during deployment

1-67744

Website with host headers cannot be deployed through Application Architect

1-67745

AA: Using the Portal Page Wizard, creating a portal page for an entity that already has a page created brings in the existing page parts

1-69440

AA: Enable Multiregional Support does not overwrite the existing connection.config file

1-69830

AA - review that correct files are getting into the Portal/ Page templates

1-70472

AA - when one has a File System deployment, the green 'run' button does not work as expected (web browser not opened)

1-70876

AA: for a portal tasklet limited by entity, the tasklet is not appearing in the web client listview where the table name is 'C_Toy', and the associated entity name is 'Toy'

1-71163

AA: Exception occurs when user deletes a portal in Project Explorer

1-71224

AA - review clarifications needed in the 'help' related to performance enhancements for JavaScript

1-71557

Sync Server: When deploying web portals to remotes, the status window title says Sending Portal Deployments to 1 Secondary SyncServer(s)

1-71574

AA: All portals are deployed when using Advanced Deploy, even when a specific portal is selected

1-71581

AA: When configuring an item from the advanced tab, the description is displayed across the OK button when the name is too Long

1-71846

Remove the option to set the source path of Support Files in Application Architect

1-72039

AA - Pressing escape when the tasklet entities combo is open still causes the changed flag to be set.

1-72040

AA - Selecting deployment and snapshot nodes in the deployment explorer does not display those items in the properties window.

1-72041

AA - The deployment node icon in Deployment Explorer does not match the deployment editor icon in the MDI workspace.

1-72210

AA: Update help steps for creating an Entity Page on a Portal to include Entity Type property requirement

1-72552

AA - Users are not notified if there is an exception during the custom deployment step for JavaScript minification

1-72565

ContextualListConfiguration.xml - <ReferringPages> spelled wrong

1-76361

AA: Save all button does not clear the indication of a change from the Window menu dropdown

1-76635

AA: Error when changing the Alias and Title after first creating a Portal

1-76636

The Disconnected Web Client install should install the Sage SalesLogix Desktop Integration Module

1-76693

AA: Services, Modules, and Tasklet items are not created and saved correctly when using the tree view

Portal Manager

1-54028

AA: No "Open" or "Edit" Right-Mouse menu item for Manifests

1-56416

AA: If a file is opened from the VFS explorer in one instance of AA, then programmatically deleted and recreated in another instance, then receive an exception error

1-56630

AA: Need to register the appropriate DLLs for the portal when a portal is deployed.

Portal Page

1-63779

AA: Error occurs when user clicks dropdown to update the Allow Roles field for a SmartPart that contains a deleted Role

1-72203

AA: Validation errors do not specify what the actual failure is during deployment

Portals

1-52076

User is unable to select an SLX Account to be the Customer Portal user

1-52680

[AA] Deployment Tab: White text not showing clearly. "Plus" graphic not centered correctly on button

1-52683

[AA] Advanced tab text and graphical issues

1-55914

[AA] Creating a new folder in a portal on the tree view does not reflect the change in the detail view and vice versa

Process Orchestration

1-63939

Change Workflow process naming conventions

1-64178

Capitalization of sage.platform.process.dll not consistent with other dll's

1-64540

Goal Driven Workflow has incorrect caption (Sequential Entity Workflow)

1-64832

Move User Configuration of Process Host Portal into Deployment

1-70846

Process Orchestration Persistence Broken

1-72117

Sequential Activity with Timer not working Process Orchestration

Project Recycle Bin

1-76437

AA: Unable to sort Recycle Bin columns

Project Workspace Manager

1-66893

AA - Select Project Backup File to Restore From: unable to change column width via mouse

1-70899

Selecting a network path saving a Project backup gives the error: Specified argument was out of the range of valid values. Parameter name: driveName (Sage.Platform.FileSystem)

1-72491

Removing a project with a working directory of the root drive deletes all files on the drive

1-72973

AA - creating a new project on C:\, and checking option to 'Export Files Upon Creation', results in an error

1-72974

AA - when trying to restore a project with a working path of C:\, receive error

1-74525

AA: When logging into the OS as different users, local projects are not displayed in the Project Workspace

Projects

1-68535

AA: App Architect crashes if left open and a file from the Project Model is being edited using Visual Studio

1-70657

Beta1 - Error creating manifest from project differences

Quick Forms

1-49509

Quick Forms - DateTimePicker control: the SelectedDateTime property appears to be ignored

1-49732

Quick Forms - DependencyLookup control: the 'HotKey' property appears to be ignored

1-49733

Quick Forms - DependencyLookup control: the 'IsReadOnly' property appears to be ignored

1-49779

Quick Forms - ListBox control: the ToolTipKey property appears to be ignored

1-49780

Quick Forms - ListBox control: the MultiSelect property appears to be ignored

Quickform

1-67331

AA: Quickform with one column and one row set to 100% causes the UI to be scrunched up like there isn't enough room

Remote Client

1-52171

F1 does not respond when focus is within the Speedsearch Options dialog

1-52174

Menu option for in remote client contains a space in the title Speed Search options

1-67177

What's New page doesn't prompt user to request files from server when opening

1-70125

Remote Database sxd files do not show icon for use with AttachRemote.exe using Windows 7/Vista/2008

1-74791

SyncClient: Key words used to determine the type of error is not being localized

1-76507

Error occurs when modifying an activity that has been completed in Outlook.

Remote Office

1-67437

Speedsearch page shows empty Filters box on right

Replace Data Wizard

1-74863

Custom field will not display in Replace Data Wizard if the field name exists in another table

Reports

1-61976

Summary of Actual Amount for a Sales Rep doubles or triples on the Quota vs Actual Sales report when two or three total Quota record exist for the user.

1-67072

Added Lines 187 and 188 do not make any sense... they appear to be code

Sales Client

1-46679

The Admin/Owner of a Sales Process should be notified that the Sales Process is associated to number of opportunities before editing.

1-47786

Crystal Reports - Crystal Reports database error when run against ticket groups

1-47961

Lookups not invoked via QuickFind may use an UPPER statement which slows performance

1-48325

Hotkeys not working on Activity Notepad

1-48351

User_activity records for the exception activity should match the master record unless the date/time was modified

1-48389

List Index Out of Bounds error message displayed on Replace Data wizard

1-48426

Status bar on the Account Opportunities view does not update data without refresh

1-48514

Localization - Script error when adding a Product Package

1-48554

Localization - Subtype selection button in Advanced Lookup does not work

1-48571

Localization - Error message pop-up in "Insert New Literature Item" dialog when using hotkeys

1-48590

Localization - Duplicate Hotkey

1-48606

Localization - Truncation OR Horizontal Scrollbar missing

1-48651

Unable to rename the custom field in footer of a template.

1-48654

Localization - Wrong button icon used in Contact detail view

1-48662

Localization - "Help" button doesn't work in the "Select Web Template" dialog

1-48663

Localization - Missing "Lookup" string in window title missing label in "Advanced Lookup:Opportunity" dialog

1-48668

Wrong icons used for date fields on SLX Report Manager View

1-48675

Localization - Wrong icon is used on browse button in "Advanced lookup: OPPORTUNITY" dialog

1-48727

Personal Family folder for More Tabs is displayed in the wrong position of the tree for Contact Detail view.

1-48728

Localization - Hotkeys not indicated in "Activities" view if the focus is not on the tab

1-48729

Localization - Duplicate hotkey in Calendar - Options dialog

1-48730

Localization - Wrong icon is used for search button in Opportunity - Reseller dialog

1-48891

An error occurred executing from script (System:SLX Report Manager View) when entering a value in a report query

1-48902

Mail Merge dialog is displaying the old group name vs. the displayed name for current groups and specific groups.

1-48932

Movement of group conditions in query builder moves parenthesis but not AND/OR connectors.

1-48954

Localization - Design RCM item does not work for the Update Dates form on the localized version

1-49116

Localization - Wrong button icon is used in the "Add Lookup" dialog.

1-49119

Localization - Wrong title of "Edit Sales Process" dialog

1-49120

Localization - Wrong title of "Copy Sales Process" dialog

1-49123

Localization - Wrong icon is used on browse button in the "Tickets" dialog

1-49125

Localization - "F1" can't launch help on the "Export a Group" dialog

1-49128

Localization - The strings are not align in the "Leads" view

- 1-49131**
Localization - "F1" can't launch help on the Data Link Manager

- 1-49163**
Localization - Hotkey doesn't work in the "Manage Resources" dialog

- 1-49164**
Localization - "F1" can't launch help on the "Complete an Activity" dialog

- 1-49166**
Localization - Hotkeys do not work in the "Event Editor"

- 1-49167**
Localization - Hotkeys don't work in the "Add Address" dialog

- 1-49168**
Localization - Hotkeys don't work in the "New Sales Process" dialog

- 1-49187**
Localization - "F1" can't launch help on the "Release Plugins - ***" dialog

- 1-49194**
Localization - "F1" can't launch help on the "Insert New Defect" dialog

- 1-49195**
Localization - Hotkey "u" doesn't work on the "Print Calendar Reports" dialog

- 1-49205**
Can't perform contact phone lookup on phone numbers starting with a plus sign

- 1-49230**
Lookups return no data if using square brackets [] in the query

- 1-49275**
If you User is retired, and that user was on a Team that is Assigned To a Ticket, the Retired User is still include in the list of recipients.

When the zip code entry is removed from an account's address, the city, state and country entries all run in the same line

1-53780

'Move' controls on the Update Multiple Opportunities view are accessible when grayed out

1-53781

Hotkeys not working on C/A/O "Keyword Search" view

1-53790

Send By hotkey not working in "Literature Request" dialog

1-53791

Unnecessary hotkey assignments on the Add Attachment dialog

1-53806

Only one hotkey assignment on the "Save Grid Contents" dialog, and it doesn't work

1-54314

Mail Merge - "The mail merge engine...Multiple Step Operation generated errors. Check each status value" error, with template names longer than 62 characters.

1-54430

Overlapping text on the Phone Dialer Help | About screen

1-54499

Unable select all activity notes using a Ctrl+A function

1-54539

Some Lookups in Contact Detail Views, don't have the 'Create a temporary group containing all results' options

1-54543

When using VISTA, an error message appears when the HELP button is click from the Insert New Asset dialog window

1-54602

Newest notes are not being displayed at top in the Notes/History tab

1-54817

In Query Builder, when selecting dates on the calendar control (condition on a group) the number in focus doesn't become Highlighted

1-54905

Subject line of Defect changes to Tickets subject when associated to a ticket from the Defects view

1-54932

Preview or print and observe that the line detailing the Contact/Account/Regarding overflows beyond the layout.

1-54935

Notes created via the Activity Notepad are not timeless by default, unlike notes created other ways

1-55029

Disabling the Navbar from the View menu doesn't stick

1-55068

When sending an E-mail, containing note information, to a contact through the Notes/History tab, the 'To' field in Outlook is not being populated with contact's email address

1-55079

In the Web Client, when the user modifies 'Default Owner/Team' field in the Options view, it is causing all the fields in the 'Other' tab in the Options view to be blank in the LAN client

1-55348

When an account name is changed, the word "account" in change confirmation window is misspelled with three c's

1-55443

It is not possible to delete 30,000 Leads, script error appears, system fails to delete more than 750 leads and sometimes fails to delete more than one lead

1-55446

When a matching Contact is entered and the 'Look for Matching Records' is selected, only the Account match is displayed

1-55535

Should not be able to assign public contacts/accounts on the Complete Personal Event dialog without the Allow Public Contacts option selected in the Admin

1-55538

Exception Access Violation error sporadically displays when Activity Reminder is open in certain scenarios

1-55550

Opportunity and Ticket fields should not exist on the Complete Personal Event dialog

1-55561

Opportunity list view blanks when running a report via the Opportunity Statistics view

1-55585

When an account's URL address starts with 'HTTPS' and the Web icon is selected to open the site, in the internet browser 'HTTP://' is added in front of the 'HTTPS'

1-55586

Web: When an account's URL address starts with 'HTTPS' and the Web icon is selected to open the site, in the internet browser 'HTTP://' is added in front of the 'HTTPS'

1-55616

Contact Group displaying activities within last xxx days is also showing activities for the next day.

1-55623

After running a lookup against the database it is not possible to Edit/Delete any groups in the group manager until focus is put on another group

1-55672

Record count values can display incorrect information when selecting Go to Contact from Activity Main View and the first record selected does not have a contact

Known Issues - SLX 7.5 SP3

8/20/2010

1-55742

The phone dialer may open with the wrong locale when launched by double-clicking on a phone number field

1-55746

Multi-byte characters may display as garbage in the template editor, in the More SalesLogix fields

1-55751

Day view calendar does not display the day to which the activity is dragged

1-55787

Localization - Icons truncated on "Add Contact/Account Information" dialog

1-55885

Blank user name and passwords are not allowed

1-55894

Unable to delete an Event from the Activity Main View without first left mouse clicking on the event

1-55898

Access violation error appears when user tries to drag the 'Contact' tab to either right or left in the middle pane

1-55931

"&W" hotkey not working in "Assign Default Behavior" dialog in the Check for Duplicates Wizard

1-56167

Lookup: "There's no SQL for QueryLookup" error

1-56216

Priority value does not display on the Confirm Activity dialog when displayed from the Confirmation Tab

1-56373

Moving an appointment to a later time changes the reminder time inappropriately

1-56520

Refresh Activities option in the Admin does not refresh the activities in the client without requiring the use of F5

1-56628

Add Opportunity Product form takes a long time to populate its tree view on systems with 50,000+ products.

1-56858

Calendar activity initially displays incorrect user color

1-56878

SalesLogix opens to foreground after activity selected from activity alarm

1-56889

Editing a 'Completed on' Date in the Sales Process grid collapses the grid

1-57084

Dashboard - User security does not work with History records.

- 1-57214**
Alarm settings randomly changing times after changing minutes/hours/days

- 1-57265**
User A can move User B's personal activity to a new date and time on the Calendar view

- 1-57276**
Under the LAN Client, changing the 'Est. Close' date from the drop down list within an Opportunities group and exporting the group to Excel, an additional time value of '09:07:18' is added after the date under the 'Est. Close' column.

- 1-57330**
Activities save text overwrites temp.txt

- 1-57358**
Sort on Requested by does not work

1-61931

Attachment - Print not grayed out if printer doesn't exist

1-61939

Attachments - Email Icon and menu items are active when no email tool installed

1-61982

Cancel button changed to inactive after Attachments selected in Insert New Ticket

1-61988

Editing a description in Insert Attachments updates previous file

1-61994

"Insert File" icon history not linked to Options or Grid "Insert File" in Attachments popup

1-62017

Mouse scroll wheel does not page through records in grid

1-62173

Contact/Lead lookup - once you've search, should provide "dual" focus in search text field and grid

1-62292

If member doesn't have access to lead related activity, the Contact and Lead radio buttons are still enabled

1-62364

There are duplicates of the templates in the Eval db.

1-62428

"There is a conflict scheduling a resource at this time. Do you want to continue scheduling this activity?" error occurs when there is no resource conflict.

1-62523

Column prefix 'ADDRESS' does not match with a table name error when removing city and state layout from a Campaign target group

1-62533

Switching from the Activities view to the Reports view does not change reporting group to Activities

1-62546

Lookup Contact/Lead: Contact lookup has grid and Lead lookup doesn't

1-62589

User is prevented from deleting own history record from calendar, but can via detail view: we should be consistent

1-62594

Minimizing the Manage Sales Process Dialog in the Architect/Sales Client will cause the Dialog to minimize behind the main view causing the need to click on the main view to bring the Manage Sales Process Dialog to the front to be accessible.

1-62602

Updating stages view in Sales Process allows the Order column edits and should be read only.

1-62681

After creating a mail merge to email with missing email address the error that is presented asks for a decision to view the created group or not, if yes is selected the detail view is displayed and not the created group.

1-62715

Change the lookup functionality to not automatically search

1-62744

Add URL dialog for note has title of 'Add URL for: Activity'

1-62799

For history records and notes, disable the Automatic Follow-up field, as it does nothing

1-62873

Select User dialog on Activity Members tab should highlight current leader by default

1-62958

If you schedule recurring activity and view small navigation calendar, there are what look like "dots" next to the recurring days

1-63251

After writing letter using template and beginning the completion of the Complete Document dialog, the result field is blank and should default to Complete

1-63266

After writing FAX using template and beginning the completion of the Complete FAX dialog, the result field is blank and should default to Complete.

1-63307

Script Error from Help web page opened in LAN client

1-63321

LAN: Deleting Picklists from the Client, user gets EAccess error message in first few deletions.

1-63333

Using Write Address Labels, the label preview will default to the last contact in focus and the last address label type.

1-63549

Printer settings saved in the Crystal Report are ignored when printed from SalesLogix Crystal Report Viewer

1-63572

When selecting a date using the calendar control in the Literature request the date that is chosen will bank out.

1-63603

When you schedule an activity from the Events tab, changes the color of the event in the list

1-63614

Receives "Fail to parse SQL" when selecting an added item containing an apostrophe from the Opportunity Status Picklist

1-63622

Smart Quotes do not copy into SalesLogix correctly

1-63623

Adding an opportunity to an Account with multiple sub offices u get a list of all the contacts in all of the offices not just the specific office selected

1-63731

Preview Target List - lower case characters are treated as being greater than Z in a sort

1-63761

Color change for checkbox control not working with Vista

1-63762

Selecting Account Reports from the right click menu on the NAV bar does not change the report type to Account

1-63804

The Alarms tab in Activities list view does not show another user's activities with alarms

Known Issues - SLX 7.5 SP3

8/20/2010

The Personal tab in Activities list view does not show another user's personal activities

1-63854

When in Mail merge - Address labels you select the specific radio button you don't see contact or leads

1-63908

Illegal value can be used for last/next call date for leads

1-63918

Activity Conflict message displays when automatically scheduling a follow up activity at the same time of the completed Activity

1-63941

If inserting a note requires a scheduled date and time, the customer wants the 7.0.1 functionality to be returned.

1-63960

Attachment removal message should refer to the server

1-64014

'SpeedSearch options' option is not available in SLX client, beneath Tools/Manage sub-menu.

1-64029

The opportunity snapshot does not display multi-byte characters when they are used for a process Stage

1-64163

In Web Client calendar view, the calendar right arrow for advancing weekly view requires two clicks if the screen resolution is set to 1024x768

1-64173

Copy to clipboard order should be alphabetical

1-64188

Campaign response lookup should display "Acct. Manager" column as opposed to "Manager"

1-64222

"An error occurred executing active form script (system:manage targets).error calling method OnButtonClick Failed to parse SQL. At line 570, char 5" error when a Contact Group does not have the field.

1-64226

User calendar select button on the activity main view is cutting off the bottom of the user name.

1-64250

When you send an email through tickets, the To: field isn't populated with the selection. The CC field is though.

1-64273

When opening a confirmation, not removing the confirmation will actually remove the confirmation from the Confirmation tab.

1-64277

Edit Recurring activities dialog "X" should close window and not open the edit window

1-64278

Known Issues - SLX 7.5 SP3

8/20/2010

Accelerator keys not active for editing recurring dialog until popup is selected

1-64280

ALT key removes labels in the edit an activity dialog

1-64301

Calendar - Selected activity not in current month is not displayed

1-64334

Left hand border of scroll button missing in Notes/History filter for Activity Type

1-64345

Export group to Excel not returning expected results

1-64346

Setting Merge Rule to Remove in Standard Menus is ignored

1-64373

Conditions for a copied group are not saved correctly if edited before saving

1-64403

Notes tab in Leads - name left as default - Form - inconsistent

1-64417

When using a date field in Advanced Lookup and refreshing client no records are returned in Lookup Group

1-64561

Re: B2 - Speedsearch - erratic "flashing" on Speedsearch advanced form and standard form

1-64564

Select Users to View button font slightly cut off at bottom.

1-64567

SalesLogix LAN Reporting returns incorrect results if conditions are not saved prior to generating report.

1-64775

Export to Word only exports notes/history items that are displayed

1-64810

Button and verbiage don't line up correctly in the SLX Client install piece

1-64834

"Failed to parse SQL" error using Replace Data Wizard

1-64853

LAN: DEFECT: Ticket tab loads slowly on Accounts with many tickets

1-64892

F9 to create new note brings in wrong Contact

1-64928

Attachments created with Basic Letter template do not retain the date they were created (merged)

1-64931

ORACLE Script Error when deleting an account

1-65077

Calendar items in 7.5 do not highlight when selected as in previous versions

1-65105

The default sort order for attachments on Contacts is by name, not by date

INTL: Sales Process stage consisting of multi-byte chars doesn't display correctly in the opp Sales Process tab

1-75552

When selecting to swap to fields in the Replace Data Wizard, if a field contains a NULL value it does not swap the data

1-75572

SalesLogix does not create activities for attendees added via a distribution list with AOI enabled.

1-75876

SalesLogix screen is brought to the front when Send SLX to an email that is duplicate and "Prompt for Duplicate Contacts" is Unchecked

1-75879

When deleting an attachment that is shared by several contacts, the attachment reference is removed for the one contact and the file is removed, but there are still references for the other contacts resulting in data integrity issues

1-75885

Sub type Picklist is blank for prospect inserting new Account

1-75890

Leads Attachments cannot email although the Do Not Solicit box is not checked

1-75920

Calendar Reports show Timeless activities completed a day earlier then they were actually completed.

1-75941

Calendar view always shows the logged in users completed Activities even when filtered

1-75987

Phone numbers with 7 digits only are being prepended with leading zeroes.

1-75992

DateTime Edit control Calendar closes using arrow key on Insert forms

1-76036

Emails with attachments cannot be opened when selected form the Attachments Tab of the View Completed Email dialogue

1-76058

Converting a Lead and adding to existing account creates a contact without a primary or shipping address checkboxes checked.

1-76148

Lookup results not refreshing when lookups performed in a certain order.

1-76238

Exporting selected records to excel will have incorrect records exported when a group is in a certain configuration.

1-76349

"An Error occurred executing active form script (System:MoveContact). Error in include script(SYSTEM:SLX DATABASE SUPPORT) Error calling method btnOkClick" error occurs when copying an existing contact to another account keeping the same address.

1-76377

An error occurred executing active script (System:SLX View Launcher). TViewManager.ShowRecord: could not retrieve the default details for xxxx at line 27, char 8

1-76558

Hidden widgets on Welcome page still try to load on login

1-76607

Order of tabs is changed back to default when tab added or removed in Web client

1-76723

LAN: When editing a Campaign Task Need Date field, the new Date is saved into the Status field in the datagrid.

1-76725

LAN: When editing fields in the Campaign Response datagrid, the edits are lost when the record is saved or refreshed.

1-76727

Timeless Activities do not appear on the Sales Dashboard due to defect in the GetActivityList function

1-76789

Web: When the user is viewing a specific group the group count is being queried multiple times.

1-76824

Localization - Script error occurs when select "Export to Excel" for accounts.

1-76912

Activity performance for rolling over activities and refresh of Activity ListView after modifying the leader

1-76935

Setting Required User Options topic contains a numbering typo

SData

1-71118

SData password cache does not update when user password changed in admin

1-71858

[http://localhost:3333/sdata/slx/dynamic/-/accounts\('AGHEA0002669'\)/addresses](http://localhost:3333/sdata/slx/dynamic/-/accounts('AGHEA0002669')/addresses)

1-72509

SData feeds sort incorrectly with use of orderby

1-72513

SData cannot handle Personal Contact Records

1-72594

SData: Doesn't support "NULL" or Boolean literals in the "where" clause

1-73020

Application Architect UI does not warn user who uses reserved words as entity property names

1-73650

Topic Incorrect: Configuring the SData or Process Host Portals (Windows 2008)

1-75834

Special characters (i.e. ampersand) in SData queries not working

1-75892

Sage.Platform.SData.ExpressionToCriteriaVistor.SimpleExpression needs to use ConvertEx instead of Convert

1-75916

Sage.sdata.client.dll missing from upgrade

1-76713

Missing File Sage.SalesLogix.GlobalCrmContractAdapter SData deployment

1-76721

Sync Service not running

1-76903

Activities Feed Broken in Reloaded but fixed in Augusta

SDK

1-76836

test defect

Security Explorer

1-53747

Available users to choose from does not include "Teams" or departments in Security Explorer

1-54733

'Allow Roles' property should be disabled for Customer Portal pages, Smart Parts etc.

1-55387

Roles in Security Explorer do not follow the same right click model that most other areas in AA incorporate

1-56147

Once a Security Role is deleted, it is not being removed from the Smart Part property if previously defined.

1-63778

AA: SmartParts with a deleted Role do not display for any of the web users

1-66510

AA: Error when user deletes a role from Security Explorer

1-70502

AA: The first role that is created does not display in the security explorer in "real time" as it does with the consecutive roles

1-70652

AA: RMB clicking Roles in Security Explorer does not show the option to Add Role on the first RMB click

1-70823

AA: Error when deleting Role from Security Explorer. Error message "A different object with the same identifier value was already associated..."

1-71199

AA - on opening the Security Explorer window, it does not have focus

Signon

1-74701

AA - on signon receive exception for Sage.SalesLogix.Plugins.AdminModule.dll

SLX Profiler

1-50183

SLX Profiler fields disappear when window splitter dragged to the top and dropped

1-63726

The Reset TimeStamp button was removed from the Profiler toolbar but not removed from Right Mouse Button in Main View

1-67809

SalesLogix Profiler not recording activity in SalesLogix on Citrix server

1-73628

SalesLogix Profiler does not record on a Windows 7 Professional system with UAC enabled

SpeedSearch Client

1-55698

Highlighted text does not 'push through' when selecting the Search button in the Ticket Details tab

SpeedSearch Service

1-49066

Speedsearch only returns a maximum of 500 records no matter the value requested

1-67429

User can see items in SpeedSearch where they do not have access to account associated.

1-69519

Speedsearch does not enforce security of personal activities of users that have given another user access to his calendar.

1-72338

By delete Account or activity in web client, Identifier written to IndexUpdates table have wrong value.

1-73338

Speedsearch can take a considerable amount of time to return results when using "Thesaurus" and "Sounds Like" as your search parameters

Splash Screen

1-68264

Application Architect displays an incorrect error message when using an invalid username/password

Support Client

1-75007

Defect Activities show a completed date with the year of 2005

Sync Client

1-50279

Renamed Library Document changes will not apply to remote if Sales Client is open at the time the change is applied

1-69487

failed to download file error when trying to sync a document with an & in the title

1-69840

Autosync will not resume after a PC comes out of "Sleep Mode"

1-71759

Windows 2008 R2 - Sync Client - After running Sync Client. Remote Sales client does not have the message to refresh

1-72861

Error Operand type clash: image is incompatible with text

Sync Server

1-50035

Opportunity Sales Potential not updating after sync

1-55555

What's New does not send address changes of contacts or accounts.

1-61585

Sync Server - When set to use multiple threads, it does not report number of accounts sent to remote users

1-68150

Modifyuser does not match between remote and host database

1-71945

When attachments are synced to their destination and the tef with their information is not, no notification or warning of any type is generated.

1-72756

Leads are deleted from Remote Office after syncing a removal of a team member from a team

1-73259

Agents called by the SyncService do not run correctly. The same agent called by manual SyncServer runs

1-73468

Intl DEFECT: "Erreur OLE 80040E2F" errors occur in Syncerrors.txt under specific remote user configuration

1-74214

Conflict Resolution - Fails when only rule is "made the most recent change" and more than one remote user makes updates

1-76729

With Windows Authentication enabled, user is redirected to the login page when the Web Server is Win 2008 R2 64-bit.

VFS

1-53159

Find does not exist as an option under the Edit menu option

1-55922

[AA] When renaming the Alias of a new Portal. The VFS Explorer does not show the change

1-63931

AA: In the VFS Explorer, RMB menu selection Copy To copies the contents within the folder but doesn't copy the root folder/name

1-64772

Setting file attributes on VFS files should not cause the LastModifyTime to change

Web Admin

1-73419

Web: Getting error message when MyHistory group is clicked, login as 'pam'

1-73484

Web Client - Products and Packages Help buttons are opening default topic

1-73739

Web: Insert Product view has incorrect Icon next to Title.

1-73740

Web: Insert Product view had icon in blue toolbar. I don't think there should be any icon there.

1-73742

Web: Product list view caption should be 'Products' instead of just 'Product'

1-73743

Web: Product ->Packages tab Add Package icon does not open dialog.

1-73752

Web: Icon for Packages is incorrect.

1-73762

Web: When adding a Product to a Package, and a Quantity is added, the Quantity doesn't display in the Products tab view datagrid.

1-73797

Known Issues - SLX 7.5 SP3

8/20/2010

Web: Lead Source displaying incorrect icon in Navbar, List view, Insert Lead Source & Lead Source Detail view.

1-73835

Web Admin: Save and Help tabs are missing in Security tab area.

1-73898

Web Admin: Calendar Tab: Not able to select he multiusers in the lookup control

1-74204

Web Admin: When a profile is copied from existing user, In Other Calendars tab the Target User is displayed in the list. It should not display the target user in the list(should hide from displaying)

1-74362

Web Admin: Add Users - When first user is added it is displayed as User in the name and username fields

1-74401

Web Admin: Team Detail view/Members tab, team name that you are adding member in , it listed in look up view.

1-74491

Web Admin: Inserting new user administrator and the new user are displayed in the calendar list. It has to be filtered.

1-74574

Web: When adding a Picklist Item, the tab focus is not in the Text field.

1-74670

Web Admin: Teams: Need to click Add '+' Icon two times to open the lookup control

1-74813

Web: Add the Add New Picklist option to the Navbar RMB menu and the Administrator menu.

1-74838

Web Admin: Help for Insert Role opens Role Detail view help file.

1-74898

Web Admin: Should not display retired user in the lookup list.

1-74908

Web Admin: Removing multi users from team, Should display count on the message window

1-74924

Web Admin: Rename Name filter to Product to match the Layout field Name

1-74945

Database - SECUREDATIONS and SECUREDATIONROLES tables are missing primary keys.

1-74962

Web Admin: Team and Roles filter in AA.I am seeing propertyname cannot be resolved near property.

1-74981

Web: When a Picklist attribute is set to Required Entry, that field can be left blank when saving a new record without any

warning.

1-74985

Web: Lookup Results group is not displaying all records after navigating out then back into the group.

1-75037

Web Admin: Teams: Can drag + sign and help button in web admin

1-75172

Web Admin: Should not allow to remove or edit. If new user is displayed in the Other Calendar.

1-75173

Web Admin: Should not allow to remove or edit. If new user is displayed in the Other Calendar.

1-75174

Web Admin: Retired user should not show on the Calendars. If the status is changed from retired user to active user than the user will be displayed back.

1-75178

Web Admin: Should not allow to edit if the user is Retired.

1-75190

Web Admin: Calendar: User is not added to calendar list correctly.

1-75249

Web: When a picklist's attribute is set to Required Entry, the field can be left blank when inserting a new record.

1-75330

Web Admin: Administrator should not display in User type dropdown on user detailview

1-75336

Web Admin: For New Template user User is a manager should be disabled

1-75463

Web Admin: Name in the User summary view has to be linked

1-75511

Web Admin: If the users are added from detailview it is showing only one user in lookup result group

1-75608

Web Admin: Nice to have OK button on error message window if the licenses are not available

1-75636

Web Admin: Getting error message when creating users from existing profile and the indicator is still running

1-75649

Web Admin: Calendar Tab: Getting SalesLogix Exception when cancel button is clicked on Sage.Saleslogix.Activity.UserCalendar window

1-75678

Web Admin: IE7: Vertical Scroll bar is not sizing properly for taskpane

1-75812

Web Admin: Security profile for admin is displayed Read/Write Defaults.

1-75851

Web Admin: Message expected when trying to remove retired or template user from all Teams

1-75897

Web: In the Available Products group, Products that have a status of Discontinued display in the list view.

1-75899

Web Admin: Getting java script error for copy user from Profile may be because of ExtJS

1-75917

MatchingCriteria.xml file missing from VFS

1-75986

Web Admin: Calendar Tab: Should open the Calendar access window before inserting the user to the list

1-76020

Web Admin: Performance: Getting error message when I try to convert users to Standard roles on medium database

1-76025

Web Admin: User is not asked to change password when 'Force user to change default password' is checked in the legacy admin

1-76069

Web Admin: Common Tasks are not displayed for users when users are selected from group list.

1-76070

Web: User is able to delete Product Price level record when only one Price level record exists. This causes the Product not to display in the All Products list view. A message should display that should read: <At least one Price Level must exist>

1-76122

Web: When a new Competitor is added and saved, the Competitor name field is in focus and highlighted when the Competitor Detail view displays.

1-76124

Web Admin: Three error messages are displayed in the event log when trying to insert duplicate roles

1-76128

Web Admin: Tab key not working for users, teams, dept and roles detail and insert views

1-76198

Web: When adding a New Competitor Contact, the Work phone column header reads as: Workphone (Work Phone). It should read as Work Phone.

1-76221

Web Admin: Change message from "Templates or retired users can not be added to a team." to "Templates or Retired users cannot be added to a team."

1-76287

Web Admin: User Detail: Tool Tip for E-mail not displayed when hover to right side of the icon.

1-76424

Web: In the Product Price Level data grid, when resizing the Price column, the numeric value is right justified to the column. So when the column is resized, the numeric value doesn't display under the column title.

1-76510

Web Admin: Update the message with only "There are no available licenses for xyz User."

1-76538

Web Admin: Need to change the style for check boxes

1-76590

Web Admin: Same username is saved when a user is created in legacy and web admin at same time

1-76889

Web Admin: Getting error message "System.ArgumentOutOfRangeException: Index was out of range. Must be non-negative and less than the size of the collection". when edit is clicked(It is not happening all times)

1-76893

Web Admin: Settings for E-mail Base Template are not displayed correctly for users

1-76899

Localization - New widget descriptions is not translated

1-76901

Localization - The content of type is not localized on team.

1-61277

Web: In the Defects -> Ticket datagrid, the Description and Resolution fields appear undersized (horizontally).

1-61294

Web: Accounts Activities grid display extends passed the category column

1-61315

Web: Login Exception message

1-61342

Web: IE6 Sort in the Contacts>Marketing grid causes Preferred Contact to disappear briefly

1-61352

Web: Contact name suffix some field not readable when typing in the field

1-61361

Web: Pick lists are case sensitive for first input

1-61367

Web: Non alpha numeric characters allowed as part of a phone number

1-61369

Web: When in the insert New Opportunity, the add products icon, the green plus sign, is not aligned with the other green plus signs.

1-61406

Web: There is a consistency issue between the LAN Client and the Web Client for the boxes marked Do Not Solicit. The web client has a lower case n for not.

1-61408

If a contact is marked Do Not Mail, you can still print address labels for them.

1-61414

Web: When you change the date in the opportunity snapshot, the date puts in MM/DD/YYYY until you save. Then it puts in M/D/YYYY (if applicable). This causes a line shift.

1-61422

Web: Activity Attachments Add URL button - when you click sometimes shows Attachments tab indicator

1-61433

Web: IE6 a vertical scroll bar appears when resizing the navbar pane

1-61443

Web: In the Contact Detail view, the Account field is not visible. Only the Account hyperlink is visible. See screen shot Attachment

1-61444

Web: Contacts History Tab "Type" sort is only on a page not all records

Known Issues - SLX 7.5 SP3

8/20/2010

1-61447

Web: User Name in accounts history ordered incorrectly

1-61452

Web: The "Back" button from edit/complete an activity returns to the history tab

1-61468

Web: Members tab: Change Add Members label to Available Members (to be consistent with Resources tab)

1-61471

Web: If activity is timeless, date and time on the Time Zone Calculator tab is 05:00 PM yesterday

1-61521

Web: Insert ticket top of calendar not in task pane

1-61552

Web: If you choose Date Range then the screen options change, however, the rows don't align.

1-61573

Web: OK button should have focus on Add Content, Edit Options, and Unhide dialogs

1-61628

Web: The resizing bar b/w the nav bar & main work space can slice through the 'you have unsaved data' message

1-61673

Web: At 1280 x 960 res & above, white area displays in bottom pane of Activity Reminder and along the right side

1-61830

Web: MapQuest button should be next to the address

1-61834

Web: Activities list main view vertical scroll bar unnecessary if there's just one activity

1-62050

Web: IE6 Contact Details GMT field becomes visible through Interests/Cuisine when scrolling

1-62194

Web: More Tabs->Account Timeline - "Account" unnecessary in the title, since you're already in detail view

1-62201

Web: IE 6.0: when you hover mouse over Nav bar items, does not highlight items in green like IE 7.0 does

1-62221

Web: If activity with an alarm is assigned a member, unconfirmed activity displays in member's Alarms tab when shouldn't

1-62243

Web: What's New - Notes tab - if note is lead-related, extra space after last name

1-62272

Web: On the insert opportunity screen, if you add a competitor, delete it, then add the same one again, you can't.

1-62273

Web: If you select a bunch or reasons won then go into the link to edit them, not all of them are selected.

1-62340

Web: Vista and XP - phone field slightly cut off in Activity Reminder

1-62341

Web - Group Tabs: The group tabs does a minor jump when switching between tabs.

1-62353

Web: the map icon, the globe, overlaps the address field a little. Not, much, just a couple of pixels.

1-62419

Web: Redundant warning message for saving summary group

1-62440

Web: In the Ticket Timeline tab view, the Ticket Activity Punch In record is displaying as GMT instead of local time.

1-62459

Web - Groups: Naming of "Save As Group" and "Save As New Group" should be consistent.

1-62467

Web - Groups: Need to update caption to the dialog that names/defines the group for Add Records to Group and Save Lookup as Group functions.

1-62504

Web: If no data to display and user hasn't searched for anything, don't attempt to load data on initial display of lookup

Web: IE6 Options Activity/Alarms "Alarm Default Lead:" box not vertically aligned

1-62544

Web: Switching from a Main view to the Reports Main view does not change the default group

1-62568

Web: Schedule->Complete an Activity TACO and lead field labels touching divider line

1-62569

Web: Schedule->Complete an Activity: move TACO and lead text fields closer to labels

1-62572

Web: Lead lookup columns: Combine Last Name and First Name to make Name

1-62573

Web: When any lookup dialog initially displays, the cursor should be in the search text field by default

1-62618

Web - Query Builder: Adding new column always inserted at the end.

1-62621

Web - Groups: When navigating from an entity with multiple associations, a lookup group should be created for those multiple

associations.

1-62628

Web - Groups: Navigating from Detail to List view, current user is not highlighted in list view.

1-62630

Web: Lead Source Lookup from Add Response action item opens with the Search button wrapped to the second line with 1024 x 768

1-62642

Web: Unsaved data message from Interest/Cuisine prefs.

1-62644

Web: IE6.0 - Sometimes, if you double click completed item via calendar day view, moves UI to the right making it impossible to scroll, log out, etc.

1-62674

Web: When adding Part to a Ticket Activity, the actual form has to be saved in order to have the Part appear in the datagrid.

1-62688

Web: Account Manager sorted on first name

1-62810

Web: If you specify attachment info w/o adding it, then specify TACO info, blanks out attachment info

1-62818

Web: Cosmetic changes required to the Convert Lead view

1-62855

Web: In the Return Detail view -> Shipped To tab view, the "Add Product" icon in in the center of the tab view header, rather than to the direct right of the header like other tab views.

1-62866

WBE: IE6 Welcome page "Quick Action" and "Do You Know" contains blank lines

1-62921

In the Web client e-Mail address that contains a "&" ampersand is cut off at the point of the ampersand.

1-62938

Web: Campaign lookups in Add Target Response not ordered

1-62970

Web- Query Builder: In the Web Client when creating a new group and adding Seccodeid as a condition, it only shows the Seccodeid and not the corresponding team name

1-62980

The Ticket Journal tab is updating the Detail Updated by when it should not according to the help file

1-63011

Web> Welcome Page/Workspace - Add Content view should not hide the check box until the OK button is clicked.

Known Issues - SLX 7.5 SP3

8/20/2010

1-63066

Web - Groups: Column headers are named different after exporting a group to Excel.

1-63069

Web - Lookups: There is a blank field in the "Lookup by" drop down.

1-63073

Web: Reinserting a deleted opportunity is not displayed

1-63078

Web: Inconsistent ordering when adding opportunities

1-63089

Web: Horizontal alignment of time zone information

1-63099

Web: History Notes column not sorted correctly

1-63104

Web: Time Zone field becomes visible through calendar popup when scrolling

1-63107

Web: Lookup does not order data

1-63113

Web: More Tabs->Ticket Timeline - "Ticket" unnecessary in the title, since you're already in detail view

1-63122

Web: IE6 Edit Target Response AM/PM select option appears

1-63129

Web: "You have unsaved data" does not appear after a second edit of alternate addresses

1-63133

Web: When you add a note from Ticket detail view, takes you to Contact detail view afterwards
